

Initial startup screen

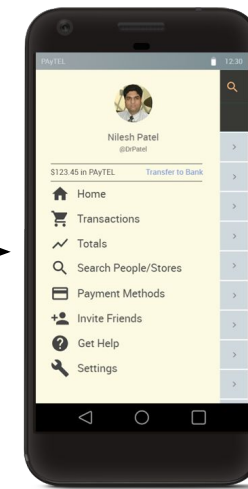

Sign-up/sign-in  
flow of actions

After signing in and every  
startup from now on, the  
user will be directed to  
the qr scanner for  
convenience (not final)

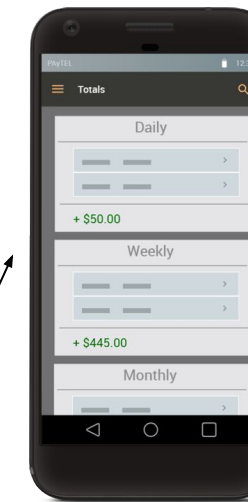

Clicking on the circle  
takes you to the Home  
page where you can  
see your added friends  
and possibly favorite  
stores

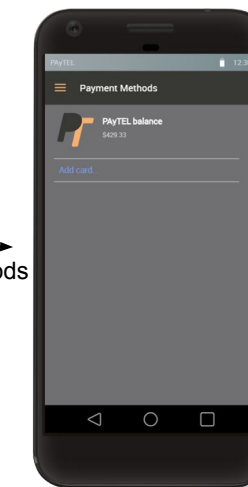

By clicking on the  
hamburger menu in the  
top right corner, it will  
bring up a menu that  
will help you navigate  
through the app

Click on totals

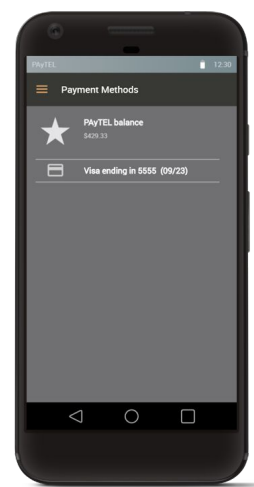

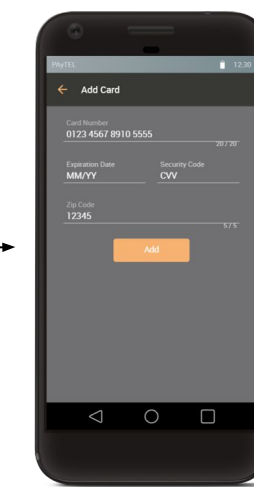

The totals screen can show breakdowns of the total  
amount spent for certain intervals of time (there's  
probably a better way to show it than this example)

Click on payment methods

Process of adding a method of payment to PAYTEL

Click on transactions

Easy way to see all of your transaction history
