PAyTEL Glossary of Terms

1. <u>2-factor authentication</u> - a method of confirming a user's identity and granting access only after successfully presenting two or more pieces of evidence (or factors) to an authentication mechanism.
   a. username/password in addition to one or more of the following: fingerprint, face scan, receiving a text message with a code
2. <u>QR code</u> - a form of a barcode which consists of black squares arranged in a square grid on a white background, which can be read and processed by an imaging device such as a phone camera. The required data is then extracted from patterns that are present in both horizontal and vertical components of the image.
   a. QR codes are mostly used for url-redirection and virtual stores.
